

DEVELOPING AN EARLY INTERVENTION PSYCHOSIS TOOLKIT FOR TAY

DATE & TIME: June 30, 2016

9:00 AM - 4:00 PM

All registration is completed on the Learning Net prior to the training. Sign-in begins 30 minutes prior to the training time. All participants must arrive during the sign-in period. Late arrivals will not be admitted.

PLACE: Joan Palevsky Center
281 S. Figueroa Street, Suite 100
Los Angeles, CA., 90012

PARKING: Palevsky Center parking is available at Figueroa Courtyard for \$14.50. Self-paid parking ranging from \$6.50 to \$14.00 is also available in surrounding area.

Developing an Early Intervention Psychosis Toolkit for Transition Age Youth (TAY) allows for a multi-approach model of addressing the early onset of psychosis among TAY. The various approaches found in the toolkit involve strategies to address hopelessness and helplessness, empowerment of TAY through trauma informed care, and implementing peer support and strengthening family engagement. Practical approaches drawn from Evidence Based Practices (EBP) models, such as CBT for Psychosis, and other “meaning making” approaches are integral when treating TAY with psychosis. Addressing psychosis by utilizing these various approaches is highly effective in engaging TAY and their families, facilitating educational dialogues about psychosis, and integrating shared decision making. This training will provide participants with essential multi-approach techniques that can be integrated into their clinical practice when working with TAY.

TARGET AUDIENCE: DMH Directly Operated and Contracted Clinicians and Case Managers serving TAY Adolescents and Young Adults

OBJECTIVES: As a result of attending this training, participants should be able to:

- 1.) Describe strategies for engaging, educating and supporting culturally diverse families with a TAY family member experiencing severe distress.
- 2.) Demonstrate how educational dialogues about psychotic experiences are designed to normalize and increase sense of hope and self-efficacy.
- 3.) Explain how recovery oriented education supports coping and manages distress.
- 4.) Identify ways to integrate trauma informed care into current approaches when treating psychosis among TAY.
- 5.) List several “meaning making” approaches and techniques for effective work with TAY experiencing psychosis.
- 6.) Explain how Trauma Informed Assessment can be used when treating TAY experiencing psychosis.

CONDUCTED BY: Wayne Munchel, LCSW

COORDINATED BY: Joaquin Castor

DEADLINE: June 27, 2016
CONTINUING EDUCATION: 6 hours for BBS, BRN, CCAPP-EI
CE for psychologists
